

Dunroamin County Club  
262 Lower Rd.  
Box 577  
Gilbertville, MA. 01031-0577

Dear Dunroamin Family,

You may have noticed some activity and are wondering what is going on. We are currently in the process of trying to change the sod farm area out where we have started removing gravel into a solar farm.

If the project does indeed change to a solar farm we may have an issue with golf balls landing in the array, which wasn't a problem with the sod farm plan. In the event that this actually goes through we want to be sure that we always have 9 holes available for play.

With this in mind we have decided that we could do a few things to guarantee that no matter what happens we will have a playable golf course. First off we are building another 1<sup>st</sup> tee. If the solar project does go through this will clear the way for a hole to come up between 1 and 6 if need be. If the solar project doesn't go through we will have a new angle for the women's back tees as well as the men's white tees. There are some other ideas that we may work on but we are trying to get this done with minimal disruption to play.

This project will help guarantee our financial stability and help insure that Dunroamin CC is here for years to come.

Thank you all,  
The Staiti and Palmer families.
